

HLG-120H series

■ Features :

- Universal AC input / Full range (up to 305VAC)
- · Built-in active PFC function
- High efficiency up to 93.5%
- Protections: Short circuit / Over current / Over voltage / Over temperature
- Cooling by free air convection
- · OCP point adjustable through output cable or internal potentiometer
- IP67 / IP65 design for indoor or outdoor installations
- Three in one dimming function (1~10Vdc or PWM signal or resistance)
- · Suitable for LED lighting and street lighting applications
- · Compliance to worldwide safety regulations for lighting
- Suitable for dry / damp / wet locations

HLG-120H-12 A

Blank: IP67 rated. Cable for I/O connection.

A: IP65 rated. Output voltage and constant current level can be adjusted through internal potentiometer.

B: IP67 rated. Constant current level adjustable through output cable with 1~10Vdc or 10V PWM signal or resistance.

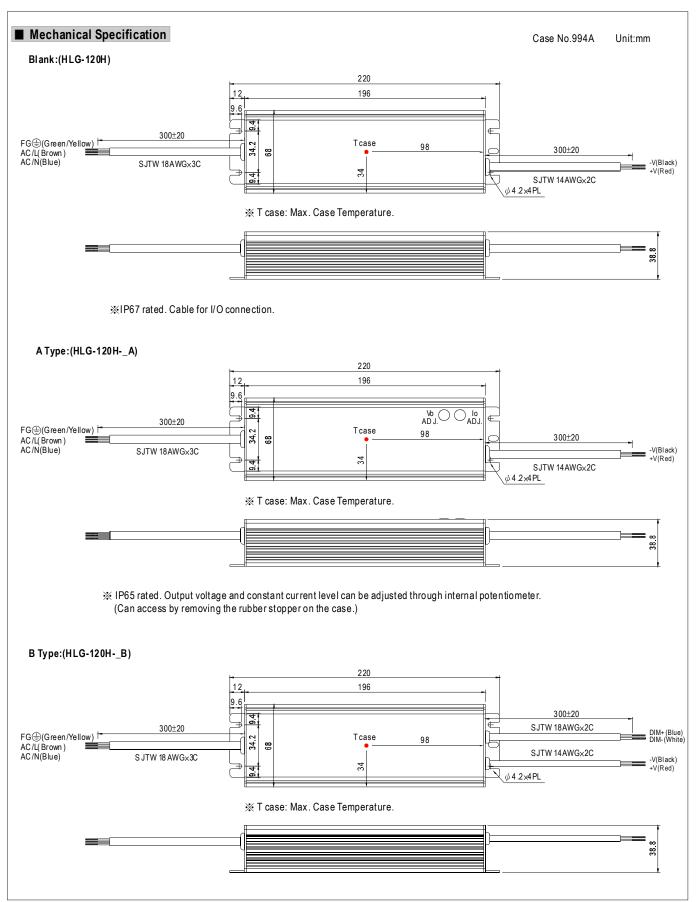

D (option, safety pending): IP67 rated. Timer dimming function, contact MEAN WELL for details.

SPECIFICATION

Please check the static characteristics for more details.											

- A type only.
 A type only.
 C Safety and EMC design refer to EN60598-1, CNS15233, GB7000.1, FCC part18.
 Length of set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time.
 The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
- 9. Refer to warranty statement.

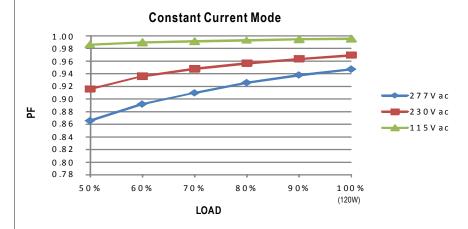

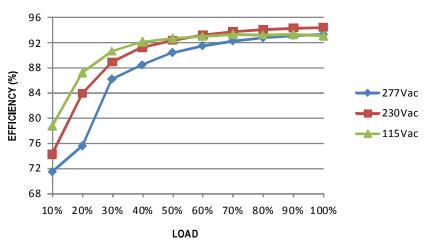

■ Power Factor Characteristic

■ EFFICIENCY vs LOAD (48V Model)

HLG-120H series possess superior working efficiency that up to 93.5% can be reached in field applications.

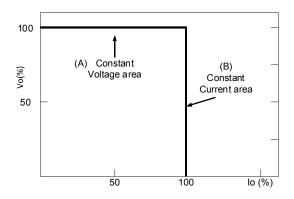

■ DRIVING METHODS OF LED MODULE

There are two major kinds of LED drive method "direct drive" and "with LED driver".

 $A typical \, LED \, power \, supply \, may \, either \, work \, in \, "constant \, voltage \, mode \, (CV) \, or \, constant \, current \, mode \, (CC)" \, to \, drive \, the \, LEDs.$

Mean Well's LED power supply with CV+ CC characteristic can be operated at both CV mode (with LED driver, at area (A) and CC mode (direct drive, at area (B).

Typical LED power supply I-V curve

■ DIMMING OPERATION (for B-type only)

- \times Please DO NOT connect "DIM-" to "-V".

Percentage of rated current

*Direct connecting to LEDs is suggested, but is not suitable for using additional drivers.

20%

 $\label{lighting} \mbox{Dimming connection diagram for turning the lighting fixture ON/OFF:}$

Using a switch and relay can turn ON/OFF the lighting fixture.

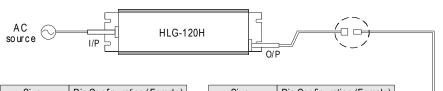

- 1. Output constant current level can be adjusted through output cable by connecting a resistance or 1~10Vdc or 10V PWM signal between DIM+ and DIM-.
- 2.The LED lighting fixture can be turned ON/OFF by the switch.

■ WATERPROOF CONNECTION

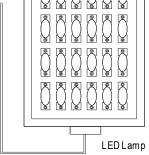

Waterproof connector

Waterproof connector can be assembled on the output cable of HLG-120H to operate in dry/wet/damp or outdoor environment.
