# KT Series
Temperature Controller

KT Series

Overview

Common Features

▶ Multi-input: Versatile thermocouple, RTD, DC Current, DC Voltage
▶ Control modes: PID, on/off control, Anti-Reset-Windup (ARW)
▶ Control output: Relay, non-contact voltage output
  (for SSR drive, DC current output)
▶ Accuracy: ± 0.2% span
▶ Simple operation
▶ Heater-burn-out alarm available
▶ Alarm output with 9 different operation modes
▶ RS485 ASCII/Modbus communication available
▶ Supply voltage: 24V AC/DC or 100 to 240V AC
▶ Compliant with UL, CSA standards and CE marking

Multi-input:

▶ Thermocouples K, J, R, S, B, E, T, N, PL-II, C(W/Re5-26)
▶ RTD Pt100, JPt100, 3-conductor system
▶ DC current 0/4 - 20mA
▶ DC Voltage 0 to 1V, 0 to 5V, 1 to 5V, 0 to 10V

KT8

KT9

Application examples:

Constant
temperature bath
Scrubber

Shrink wrapping
machine

Oven

Warm and cold
storage units

Output Methods:

| Output method	Characteristics
Relay contact output	Relay contact output is used for switching up to 3A 250V AC (resistive load) in applications in which the on-off frequency is low.
Voltage output for SSR drive	This voltage output is used for driving the SSR . Since the SSR is a semiconductor relay, contact life is long. This type is used in applications in which the on-off frequency is high. Up to 40mA 12V DC can be switched.
DC current output	This current output is used to control a power regulator. Smooth and accurate control is possible because phase control corresponds to the current output.

KT Series

Display and Operation
❶ Indicators (backlight: orange)

°F °C	Lights up respectively when temperature unit F°/C° is selected.
T/R	Light ups during serial communication (option) TX output.
AT	Flashes during auto-tuning or auto-reset.
OUT1	Lights up when control output is ON or Heating output (option) is ON.
	For DC current output type, it flashes corresponding to the manipulated variable in 0.25 second cycles.
OUT2	Lights up when Cooling output (option) is ON.
EVT1	Lights up when Alarm 1 output is ON.
EVT2	Lights up when Alarm 2 output (option) is ON or Heater burnout alarm (option) is ON.
LOCK	Lights up when Lock 1, Lock 2 or Lock 3 is selected.
❷ MEMO display	Indicates the set value memory number (backlight: green).
❸ PV display	Indicates the PV (process variable) (backlight: red/orange/green).
❹ SV display	Indicates the SV (set value) (backlight: green).
❺ Mode key	Selects the setting mode and registers the set value.
❻ OUT/OFF key	Switches the control output ON or OFF and selects Auto/Manual control.
❼ Increase key	Increases the numeric value.
❽ Decrease key	Decreases the numeric value.

KT2 display and operation features:

PV indicator	SV indicator	Autotuning indicator	Indicator for serial comm.	Out1 indicator

PV/SV display (switchable)

MEMO/STEP display indicates memory number during fixed value control. Indicates step number during program control.

Event1: Indicator for Alarm 1/2 or Control Out2

Event2: Indicator for Alarm 1/2

KT4H

Temperature Controller KT4H

Space saving, high performance

- 1/16 DIN size temperature controller
- Size 48 x 48 x 56mm (WxHxD)
- Panel-mounted type
- IP66 waterproof (frontside if panel mounted)
- 2nd optional alarm output
- Heating and cooling control with 2nd optional control output (non-contact voltage output)
- 11-segment display with 3 colours for PV
- 4 set values (externally selectable)
- Tool Port as standard
- MEWTOCOL communication
- Heater burnout alarm supports 3-phase heaters

KT4H

New Features of KT4H (in comparison with KT4)

Better readability

- Time-proven display with negative LCD + LED backlight
- 11-segment LCD with improved readability
- Largest display of PV in its class
- PV indication in three different colour

1. **With negative type LCD and backlight, values can be read even under direct sunlight. Also, the 11-segment LCD displays makes it easier to read alphanumeric characters**

   7seg   11seg   Display of "N"
2. **The letter height of PV value has been enlarged to 12mm enabling it to be directly read even from a distance.**

   12mm
   Largest in its class

3. **The ability of the PV value to change color makes it easy to determine the process status at a glance (three colour available).**
Improved control functions

- Capable of 4-point temperature selection by external input.
- Control output can be turned ON and OFF externally.
- 3-phase heater burn-out detection function.
- Non-contact voltage output in heating/cooling control output available.

1. **Four setting values (SV) selectable using external input (option).**

   Selected temperature
   1 to 4
2. **External ON and OFF switching of control output possible (option).**

   Control output
   ON/OFF

3. **Heater burn-out alarm supports 3-phase heaters (option).**

   3-phase power
   CT
   CT
   (2-point CT input)
   Heater Heater
   Heater

4. **Supports voltage output for heating/ cooling control (for SSR drive) (option).**

KT4H

New Features of KT4H (in comparison with KT4)

Improved communication functions
. Connect several KT4H to FP-Series PLCs

MEWTOCOL communications protocol is built in. Up to 31 units can be connected and data can be collected using a FPΣ(Sigma) PLC.
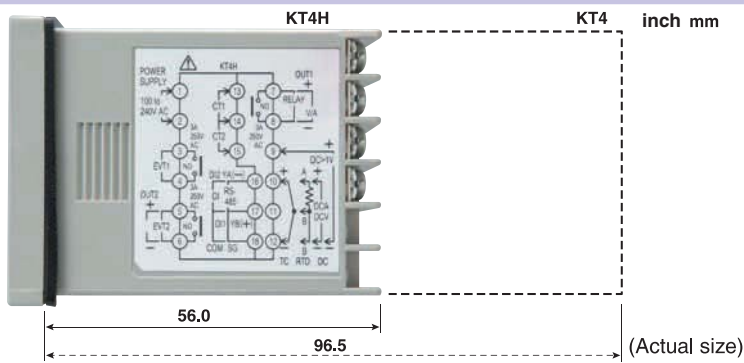

Comes with MEWTOCOL. Collect data with the PLC.

RS485

FPΣ (Sigma)
. Standard external tool port

With the external tool port, all settings can be loaded and made.

Tool Port of KT4H

(Bottom side)

USB Port

AKT4H820
Tool Port Converter Cable

KT Monitor Software

Space savings

Control panel installation length has been shortened to the utmost.

KT4H   KT4   inch mm

56.0

96.5   (Actual size)

Ability to use any sensor (input) is inherited from KT Series

The KT4H comes equipped with the ability to use any sensor (input): thermocouple (10 types), RTD (2 types), DC current (2 types), and DC voltage (4 types).

High accuracy and high sampling period also inherited from KT Series

The operation mode uses "PID control" which allows a stable temperature to be maintained. Capable of high accuracy with an input span of ±0.2% and a high-speed sampling period of 250ms.

Easier operation

The switch layout has been changed so that mode changes can be executed more easily using the front keys.

Improved switch construction provides a much more positive clicking action.

Protective construction

Despite its compact size, protective structure conforms to IP66 (front panel only, when using rubber packing).

KT4H

KT-Monitor Software

KT-Monitor is a convenient software tool for editing the parameters of KT4H, saving para-meters in a file, monitoring of temperature data, and monitoring and saving log files of designated values.

KT-Monitor Main Window
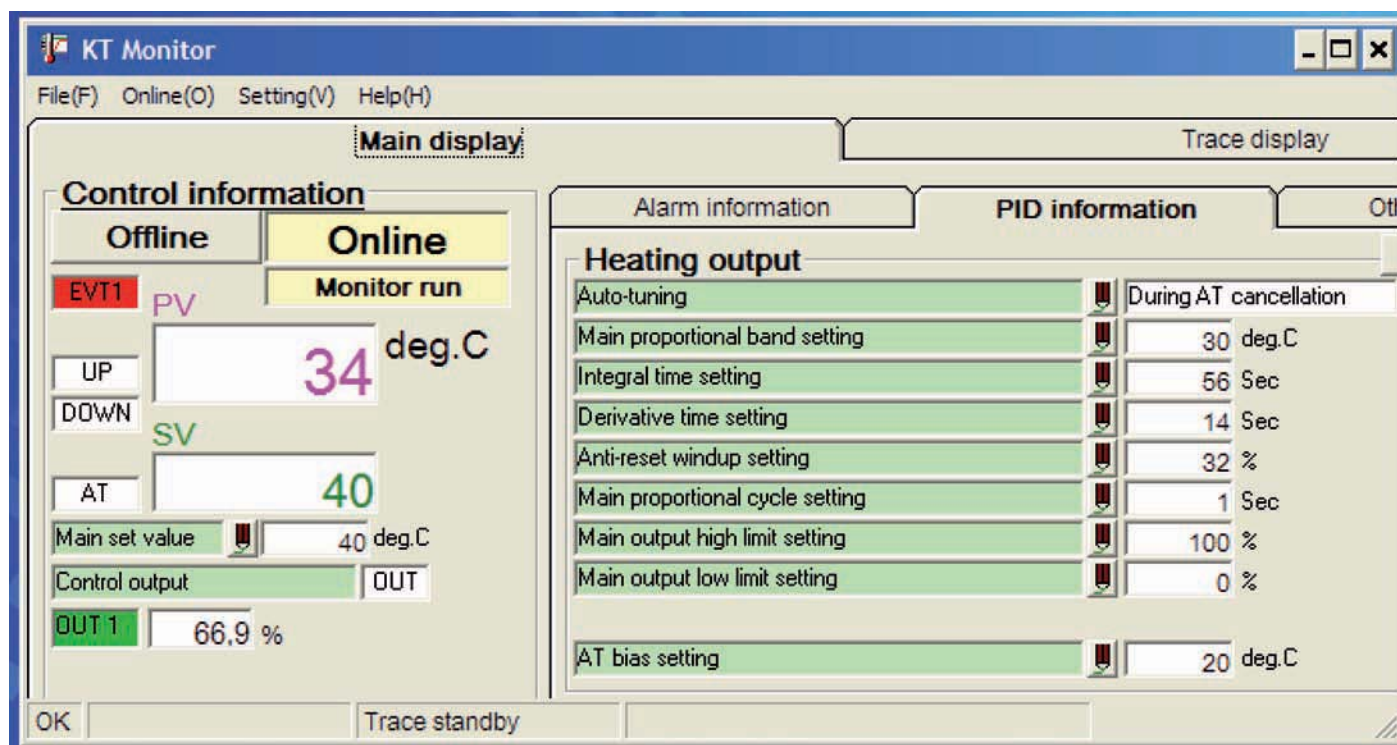

Parameters can easily be understood and are accessible in a clear, convenient form.

Ordering information: KT-Monitor Set
CD with Software, Manuals, Tool Port cable AKT4H820

Requirements: PC with Windows 98/ME/2000 or XP, USB-Port, Tool cable
AKT4H820, USB driver installed (included with KT-Monitor)

KT4H

Sampling and trend monitoring of PV, SV, MV1 and MV2

KT-Monitor Trace display

With the Trace display you can display and analyze the temperature PV, the set value SV and the control output MV. MV2 will be indicated only when Heating/Cooling control option is added. All values can also be recorded into a CSV-File for later rework with e.g. Excel.

The colours of the traces are selectable. The recording time interval is selectable (min. 1 sec.) and also the total number of records can be selected between 600 (10 min.) and 9000 (150 min.).
For scaling of the displayed values, high and low limit values can be entered.

KT2

*PV/SV switching display

KT Series

Communication via RS485 and Modbus (ASCII) or Modbus RTU protocol

Example 1
Multidrop communication with a programmable logical controller (PLC)

FP_PLC
with FPG-COM3 communication cassette

Standard ASCII or Modbus ASCII Protocol

RS485

Up to 31 units can be connected

Example 2
Multidrop communication with a personal computer

PC
with RS-232 interface

Standard ASCII, Modbus ASCII or Modbus RTU protocol

RS232

Converter
RS232 – RS485
e.g. AFP8532J

RS485

Up to 31 units can be connected

With the optional communication function all settings can be entered or changed.
Input value (PV) and other parameters can be read easily.
All commands are described in the KTC1E1 manual.

Communication via MEWTOCOL (slave) with any FP-Series PLC*

Item	Specification
Communication type	Half-duplex
Communication speed	Select 2400, 4800, 9600, or 19200 bps using key operation.
Synchronization type	Asynchronous
Protocols	Standard protocol (ASCII), Modbus (ASCII) or Modbus RTU mode (8-bit binary coding), KT4H also MEWTOCOL (Slave)
Coding	ASCII/binary
Error correcting	Command re-send
Error detection	Parity check, CRC-16 (RTU), LRC (ASCII)
Data structure	Start bit: 1 Data bit: 7 (ASCII), 8 (RTU) Parity: Even, No, Odd (Selectable), KT2: Even (ASCII), None (RTU) Stop bit: 1/2
Interface	RS485 compliant
No. of nodes	31
Maximum cable length	1,000 m (cable resistance must be within 50Ω)

Note) That main setting no. 2 is not possible on the KT8 and KT9 when the communications functions are added.

* Only for KT4H
